Hair Loss is Reversible and Preventable

Wouldn't it be nice to leave your hat or extensions at home and not worry about who is looking at your thinning hair? Wouldn't it be nice to never have to worry about losing your hair in the future? This isn't a dream; it's a reality with Dr. Lewenberg's Formula.

Dr. Lewenberg's Formula is the most complete and effective treatment for hair loss in men, women and children. Your hair is important to you and you should never have to go through the pain of losing it. Therefore, Dr. Lewenberg has developed a treatment to prevent and even reverse hair loss.

Dr. Lewenberg's Formula is effective all over the scalp, including the frontal hair line. The Formula stimulates the stem cells in the living layers of the scalp to repair the damage to the hair follicles which has already occurred. This damage can be caused by internal factors like genetics, illness or stress and external factors like medications, environmental or harsh handling of the hair. By repairing the damage to the hair follicles, you are able to regrow strong, normal, healthy new hair, improve the quality of their existing hair, and to maintain your hair. After just three months, you should begin to see results.

Using Dr. Lewenberg's Formula can help you regrow your hair and prevent future hair loss in 6 ways:

-
It works to regrow hair all over the scalp, including the frontal hair line

-
It increases circulation to existing hairs and hair follicles helping them to grow hair faster.

-

It increases the duration of the growth cycle of the hair.

-

It increases the length and thickness of your existing hair and new hair

-

It reduces the effects of DHT and stops it from reaching your hair follicles. Therefore, Dr. Lewenberg's Formula stops the progression of male and female pattern baldness.

-

Finally, it repairs damaged, dying hair follicles and can even create new hair by stimulating stem cells in the living layers of the scalp and in the hair follicles themselves.

Dr. Lewenberg's Formula is a patented solution that allows you to regrow thick and healthy hair. No other product comes close!

It doesn't matter if you have already begun to notice hair loss or if you see that your hair is thinner than you want it to be. It doesn't matter if your grandparents, parents, or siblings have lost their hair, you don't have to. You can still improve your current hair and keep your strong, lustrous, and healthy hair for the rest of your life thanks to Dr. Lewenberg's Formula.

We will tailor the treatment to your needs. To see if you are eligible for this program, please contact us.

Approximately half of all men and a quarter of all women experience some form of hair loss in their lifetime ranging from thinning to full baldness.

The most common forms of hair loss in men, male pattern baldness, is genetic and worsens over time. Often, hair loss occurs slowly with a gradual thinning or rising of the frontal hair line as thick hairs are replaced by thinner hairs or are simply fall out and are not replaced at all.

Hair loss in men can occur in adolescents as young as 16 and by age 30, 25% of all men will have noticeable hair loss. By their 40's almost half of men have lost a significant amount of hair. As startling as these statistics seem, the number of young men experiencing earlier significant hair loss is even greater than many believe. Many younger men have gradually thinning hair, which they try to hide for another few years. The most common form of hair loss in men, male pattern baldness, is genetic and worsens over time. Often, hair loss occurs slowly with a gradual thinning all over and especially in frontal hair line. The once healthy thick hairs are replaced by thinner damaged hairs or simply fall out and stop regrowing all together. This leaves you looking older than you really are or want to.

Hair loss in women is almost as prevalent as hair loss in men. Female pattern hair loss can begin at any point during or after puberty. Most women with this condition have hair that slowly thins all over, eventually becoming most sparse on the top of the head and crown. In most cases, this condition accelerates during or after menopause or other hormonal changes like pregnancy. The recent explosion in the number of "herbal solutions" and shampoos that promise to thicken hair proves just how widespread this problem really is.

Don't kid yourself. Thinning hair is hair loss. With each cycle of hair growth, the new hairs become thinner and fewer in number, exposing more skin. No matter how many concealers, thickening solutions, or dyes you use, you can only hide hair loss for a short time. Think of the number of men and women who use mousse, gels, and other products, only to have their scalp visible.

These statistics are daunting, but thanks to Dr. Lewenberg's Formula, there is nothing inevitable about hair loss.

Maintain your beautiful hair for as little \$1 a day!

The reason that maintenance is necessary is that the most common forms of hair loss, male and female pattern hair loss, or Androgenic Alopecia, is genetic and worsens over time. Fortunately, maintenance with Dr. Lewenberg's Formula is quite simple; just apply the formula once or twice per day onto clean and dry hair. This takes only a minute a day!

Maintenance is also inexpensive, as you will only use about a bottle a month to maintain your hair. For less than a dollar a day, you can keep your thick healthy hair.
